

LAB APPROVED:

Sr. No.	Test Description	Unit	Limits	Results
1	Insoluble Matter	ppm	Max 20	10.3
2	Urea Content	%	31.8 – 33.2	32.5
3	Density at 20°C	kg/m ³	1087.0 – 1093.0	1087
4	Refractive Index	-	1.3814 – 1.3843	1.3814
5	Alkalinity	%	Max 0.2	<0.01
6	Biuret Content	%	Max 0.3	0.26
7	FTIR Analysis	-	Identical to Reference	Yes
8	Aldehyde Content	mg/kg	Max 5	<0.5
9	Phosphate	ppm	Max 0.5	<0.05
10	Trace Elements by ICP-OES			
	Element	Unit	Limit	Result
	Calcium Content	ppm	Max 0.5	0.1
	Iron Content	ppm	Max 0.5	<0.1
	Copper Content	ppm	Max 0.2	<0.1
	Zinc Content	ppm	Max 0.2	<0.1
	Chromium Content	ppm	Max 0.2	0.1
	Nickel Content	ppm	Max 0.2	<0.1
	Aluminium Content	ppm	Max 0.5	0.1
	Magnesium Content	ppm	Max 0.5	<0.1
	Sodium Content	ppm	Max 0.6	0.2
	Potassium Content	ppm	Max 0.5	<0.1

NxBlue is manufactured using high-purity raw materials and undergoes rigorous laboratory testing to ensure consistent quality, purity, and performance. Each batch is tested to meet the required specifications, providing reliable operation and protection for SCR systems.

STORAGE INSTRUCTIONS:

To maintain product quality and performance, NxBlue should be stored in clean, sealed containers away from direct sunlight and contaminants. The recommended storage temperature is between -5°C and 30°C. Proper storage helps preserve product integrity and ensures reliable SCR system performance throughout its shelf life.

ENVIRONMENTAL COMMITMENT:

NxBlue supports cleaner transportation by helping reduce harmful emissions from diesel engines. Through advanced SCR technology, it contributes to improved air quality and supports compliance with stringent environmental regulations, making it an essential component of modern sustainable transportation systems.

MANUFACTURED BY:

NOxchem Industries,
By Mayur Parmar & Ganesh Sonawane.
Survey Number 44/4/4, Ward Number 13,
Sanjay Gandhi Ward, Sukhniwas, Cat Road Rau,
District Indore (MP)-453331,
INDIA

NxBlue

DIESEL EXHAUST FLUID(AUS 32)

Cleaner Emissions. Better Performance. Greener Future

NXBLUE:
NxBlue is a premium Diesel Exhaust Fluid (DEF/AUS 32) manufactured using high-purity automotive-grade urea and demineralized water. Designed for modern SCR-equipped diesel engines, NxBlue helps reduce harmful nitrogen oxide (NOx) emissions while improving environmental performance. Manufactured according to ISO 22241 standards, NxBlue ensures consistent quality, reliability, and efficient operation of emission control systems.

WHAT IS DIESEL EXHAUST FLUID (DEF)?

NxBlue is a premium Diesel Exhaust Fluid (DEF/AUS 32) manufactured using high-purity automotive-grade urea and demineralized water. Designed for modern SCR-equipped diesel engines, NxBlue helps reduce harmful nitrogen oxide (NOx) emissions while improving environmental performance. Manufactured according to ISO 22241 standards, NxBlue ensures consistent quality, reliability, and efficient operation of emission control systems.

WHY CHOOSE NXBLUE?

NxBlue is manufactured using premium raw materials and stringent quality control procedures to deliver superior performance and reliability. Its high-purity formulation helps protect SCR systems from contamination, crystallization, and injector deposits while ensuring optimal emission reduction. Trusted by commercial fleets and industrial operators, NxBlue provides consistent quality for demanding applications.

FEATURES & BENEFITS:

- **High Purity Formula:**
Manufactured from carefully selected raw materials to ensure product purity and compliance with ISO 22241 requirements.
- **Reduces NOx Emissions:**
Helps significantly reduce harmful nitrogen oxide emissions generated by diesel engines.
- **Improves SCR Performance:**
Supports efficient operation of SCR systems for optimal emission control performance.
- **Protects Emission Components:**
Prevents contamination and deposit formation within SCR injectors and catalysts.
- **Environment Friendly:**
Contributes to cleaner air and reduced environmental impact through effective emission treatment.
- **Safe and Easy to Handle:**
Non-toxic, non-flammable, and safe when stored and handled according to recommended guidelines.

AVAILABLE PACKAGING:

NxBlue is available in multiple packaging options to meet diverse customer requirements:

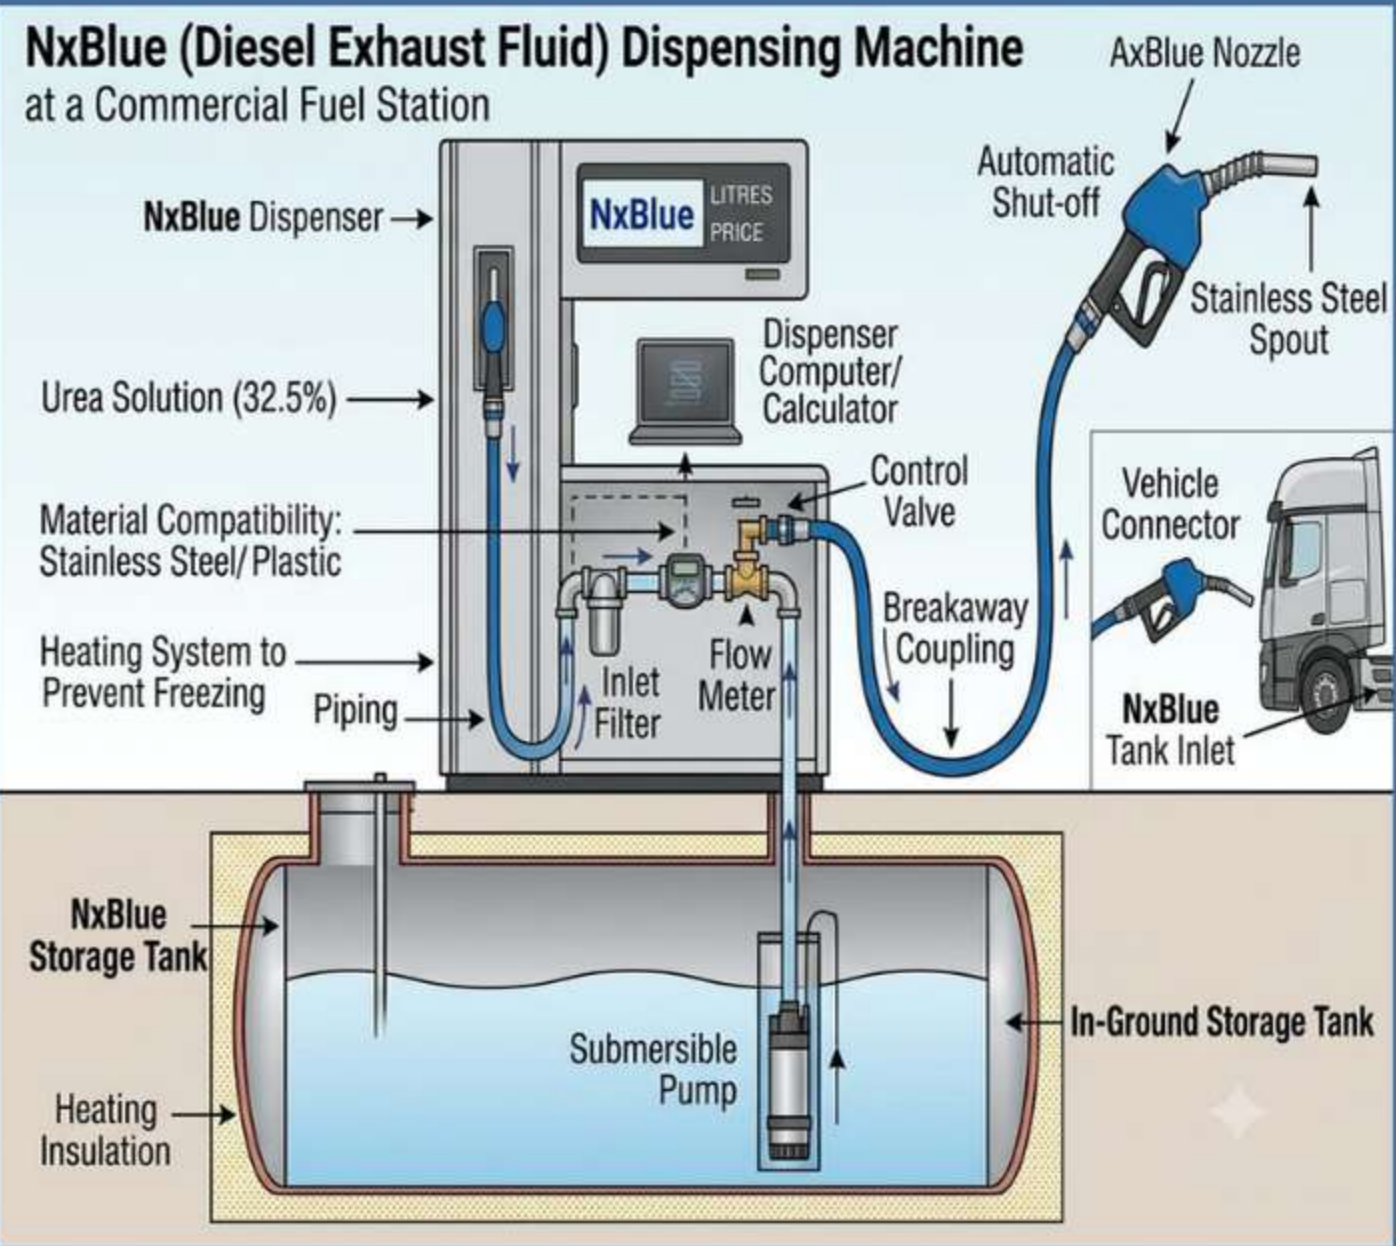

- 10 Litre Containers
- 20 Litre Buckets
- 210 Litre Drums
- 1000 Litre IBC Tanks

Custom bulk supply solutions are also available for commercial and industrial customers.

HOW NXBLUE WORKS:

When NxBlue is injected into the exhaust system, it decomposes into ammonia. This ammonia reacts with harmful nitrogen oxide (NOx) emissions in the SCR catalyst, converting them into harmless nitrogen and water vapor. This process significantly reduces pollution while allowing diesel engines to maintain efficiency and performance.

APPLICATIONS:

- NxBlue is suitable for a wide range of diesel-powered vehicles and equipment equipped with SCR technology, including:
- Heavy Commercial Vehicles
 - Long-Haul Trucks
 - Buses and Coaches
 - Construction Machinery
 - Mining Equipment
 - Agricultural Machinery
 - Diesel Generator Sets
 - Industrial Diesel Engines

COMPATIBILITY:

NxBlue is compatible with all diesel vehicles and equipment utilizing Selective Catalytic Reduction (SCR) technology. It is suitable for BS IV, BS VI, Euro IV, Euro V, and Euro VI compliant engines and can be used across various commercial and industrial sectors.

QUALITY ASSURANCE:

REDUCES EMISSION

IMPROVES PERFORMANCE
